

# Specialized Communities

## Engineering Floors

Live and learn with students from the **College of Engineering in the Theophilus Tower as a first year student or LLC Building if you are a non-first year student.**

Be part of a community with common majors, interests and goals. Our themed floor provides a stimulating intellectual and social atmosphere by offering events and support centered around building friendships with other students in your college, navigating your first year of school, and connecting with faculty and staff in Engineering.

#### **Benefits to Living in a Specialized Community...**

- Gain an instant friend group with students who like the same types of things you do.
- Extra activities related to Education, Health and Human Sciences.
- Additional time with your instructors outside of the classroom.
- Ease of group work without leaving your residence hall.
- Help with homework from your peers just outside your door.
