About the ISTPF:

The ISTPF provides opportunities for outstanding scientists, social scientists and engineers to learn firsthand about policymaking while using their knowledge and skills to address pressing challenges facing Idaho. Fellows support decision makers in Idaho, serving in yearlong assignments across state agencies. The ISTPF is a nonpartisan program and collaborative effort among the University of Idaho, Boise State University and Idaho State University. The three universities provide oversight and administration of the ISTPF, and the operation of the ISTPF is informed by the ISTPF advisory board.
